

Winter Semester 2017 / 2018 Advanced projects at the Q&U Lab

Project title: Multimodal Interaction MOOC preparation

Supervisor(s) name(s): Patrick Ehrenbrink

Contact email: patrick.ehrenbrink@tu-berlin.de

Minimum number of participants: 2

Maximum number of participants: 10

Module: Any module is fine

The course takes place online

Project language: English

Project description:

This project aims at transitioning Multimodal Interaction from Lecture & Exercise to a Massive Open Online Course format. In summer semester 2018, we plan a first online version of the course in a confined environment (ISIS course management system) without the need for students to locally attend lectures. The tasks in this project range from creating a teaching concept of the MOOC to adapting course materials. As knowledge of the course is required, only students that have successfully taken part in Multimodal Interaction the past can participant in this project.

Project requirements (desired student skills):

Participants must have attended the course Multimodal Interaction in the past.
